

NKEN MANDENG ANGE ARSÈNE

Full-Stack Developer — WordPress & Elementor · Laravel · React/Inertia.js · API & Payment Integrations

Douala, Cameroon | nkenmandenga@gmail.com | +237 699 512 438 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

WordPress Developer with 3+ years of experience building, customizing, and maintaining high-quality WordPress websites using PHP, JavaScript, HTML5, and CSS3. Skilled with Elementor and WP Bakery page builders, custom theme/plugin development, and full-stack applications with Laravel, React and Inertia.js. Strong track record optimizing sites for speed, SEO, and security best practices, troubleshooting cross-browser/cross-device compatibility issues, and managing backups and site migrations. Native French speaker with professional English proficiency, comfortable delivering end-to-end with minimal supervision. Open to remote, on-site, or freelance opportunities.

TECHNICAL SKILLS

Backend: PHP, Laravel 11+, MySQL, Eloquent ORM, Queues, Notifications, REST APIs

Frontend: React.js, Inertia.js, TailwindCSS, Zustand, HTML5, CSS3, Responsive Design

WordPress / CMS: WordPress, Elementor & Elementor Pro, WooCommerce, WCFM, WP Bakery, plugin development, theme customization

APIs & Integrations: MTN Mobile Money API, Orange Money (Smobilpay S3P API), WhatsApp API, Webhooks, Google Sheets Integration

Optimization & Security: Performance tuning (caching, image compression, minification), technical SEO, WordPress hardening & backups

Tools & Practices: Git, GitHub, Docker, Postman, Conventional Commits, GitHub Flow, Laravel Pint (PSR-12), PHPUnit/Pest

PROFESSIONAL EXPERIENCE

WordPress & Elementor Developer / Integrator — NuBet

Jan 2026 – Present

Remote

- Reduced average page load time by [X]% as measured by Google PageSpeed/GTmetrix scores, by implementing caching, image compression, and CSS/JS minification across client WordPress sites.
- Resolved [X] client-reported bugs per month as measured by support ticket turnaround time, by troubleshooting JavaScript errors, theme/plugin conflicts, and cross-browser/cross-device compatibility issues.
- Maintained 100% site uptime across [X] client sites as measured by zero data-loss incidents, by performing scheduled backups, security best practices, and site migrations.
- Delivered [X] custom Elementor builds per quarter as measured by on-time client sign-off, by translating UI/UX mockups into responsive, JavaScript-enhanced, cross-device-compatible sites.

PHP Backend Developer & WordPress Developer — Allready 237 Sarl

Sep 2023 – Jan 2026

- Delivered a multi-vendor e-commerce platform serving [X] vendors as measured by successful vendor onboarding, by building WordPress + WooCommerce + WCFM + WP Bakery infrastructure with custom JavaScript-driven UI enhancements.
- Enabled [X]% of transactions to process automatically as measured by reduced manual reconciliation, by integrating MTN Mobile Money and Orange Money via the Smobilpay S3P API with webhooks and bilingual notifications.
- Cut manual prospecting time by [X]% as measured by hours saved weekly, by automating WhatsApp-based lead outreach and phone-number verification workflows.
- Improved bug resolution speed by [X]% as measured by reduced client-reported issue backlog, by troubleshooting Laravel/React/WordPress integration issues and enforcing security best practices across production deployments.

Web Development Intern — BJFT Academy

Apr 2022 – Sep 2022

- Supported delivery of [X] client website updates as measured by on-time delivery, by assisting with responsive WordPress customizations and cross-browser compatibility testing.
- Contributed to sprint velocity as measured by consistent on-time task completion, by participating in Agile code reviews and troubleshooting frontend bugs.

KEY PROJECTS

- WhatsApp Marketing Automation Package** — PHP package that fetches customer data from Google Sheets, generates personalized prospecting messages from product data, and sends them via WhatsApp on scheduled cron jobs.

- **WooCommerce Smobilpay Gateway** — WordPress payment gateway plugin enabling MTN MoMo and Orange Money transactions for Cameroon merchants, with automated webhooks and bilingual notifications.
- **Task Management System** — Laravel + React application with drag-and-drop functionality, Zustand state management, and a dark-mode UI.
- **WhatsApp Campaign Hub** — Laravel-based WhatsApp marketing tool for bulk messaging, contact management, and scheduled AI-generated campaigns.
- **Optimum Fly — Visa & Immigration Services** — Multilingual (French/English) React, TypeScript & Tailwind CSS website for a Cameroon-based immigration assistance service.
- **Custom PHP MVC Framework** — Lightweight MVC framework built from scratch for rapid development.
- **Chirper** — Laravel/PHP social application (Twitter-style "chirps") built as a hands-on architecture study: likes and bookmarks systems, custom pagination built from scratch, rate limiting, password-confirmation middleware flow, policy-based authorization, and a shared Messageable interface unifying chirps and comments. Follows GitHub Flow with Conventional Commits, Laravel Pint (PSR-12), and PHPUnit/Pest test coverage.
